FLAMMABILITY TESTER**

TF320 NFPA 701-1 FLAMMABILITY TESTER

NFPA 701-1 Flammability Tester, is to determine the ignition resistance properties of draperies and other hanging fabrics according to test method NFPA 701#1, and it is suitable for single-layer or multi-layer fabrics, but not suitable for fabrics with density larger than 700g/m² (21oz/yd²).

SPECIFICATIONS

- Open-type burning chamber structure;
- Chamber body in calcium silicate board, and wrapped by stainless steel external;
- Standard Maker laboratory burner;
- Record burning time automatically;
- Auto-ignition mode to avoid operative error;
- Timer accuracy up to 0.1second;
- Provide with a standard specimen holder.

STANDARDS: NFPA 701-2004 Test Method 1

POWER: 220 / 110 V 50 / 60 Hz

WEIGHT: 100 kg

DIMENSIONS: 900 x 510 x 720 mm (L x W x H)
